ISKCON COIMBATORE
SRI JAGANNATH MANDIR

Mobile App API — v1

Every endpoint the ISKCON Coimbatore app needs: texts and photos for each section, the contact, volunteer and subscribe forms, and online donations through the KCM payment gateway.

BASE URL	FORMAT	UPDATED
https://iskcon-coimbatore-yztu.vercel.app/api/app/v1	JSON in, JSON out	1 November 2026

1. Basics

Authentication

None by default. If the server sets the `APP_API_KEY` environment variable, every request must send it:

```
x-api-key: <APP_API_KEY>
```

Without it the API answers `401 {"error":{"code":"unauthorised",...}}`.

> The payment gateway's secret is **never** needed in the app. The server talks to the gateway; the app only ever sees a `checkout` object or a `paymentUrl`.

Photos and videos

Every photo or video field is either `null` or a **Photo** object. All URLs are absolute.

```
{
  "url": "https://iskcon-coimbatore-yztu.vercel.app/api/media/file/srila-prabhupada.jpg",
  "alt": "His Divine Grace A.C. Bhaktivedanta Swami Srila Prabhupada",
  "width": 1200,
  "height": 1600,
  "mimeType": "image/jpeg",
  "sizes": {
    "thumb": "https://…/srila-prabhupada-400x533.jpg",
    "card":  "https://…/srila-prabhupada-800x1067.jpg",
    "hero":  "https://…/srila-prabhupada-1920x2560.jpg"
  }
}
```

- Use `sizes.thumb` (400 px wide) for lists, `sizes.card` (800 px) for cards, `sizes.hero` (1920 px) for full-screen. Any size may be `null` (for example, when the original is smaller); fall back to `url`.
- Videos have `mimeType` `video/mp4`, `video/quicktime` or `video/webm`, and `sizes` all `null`.

Rich text

Long texts written in the admin's editor (festival significance, blog posts) come as HTML strings in fields ending in `Html`. Render them in a WebView or an HTML text component.

Errors

Every error has the same shape:

```
{ "error": { "code": "validation_failed", "message": "Please enter a valid email.", "field":
"email" } }
```

HTTP	`code`	When
400	`invalid_json`	Body is missing or not JSON
401	`unauthorised`	`x-api-key` missing or wrong (only when the server requires it)
404	`not_found` / `seva_unavailable`	Unknown slug or reference, or the seva is closed
422	`validation_failed`	A field is wrong; `field` names it, `message` is ready to show the user
500	`server_error`	Unexpected; safe to retry

`message` texts are written for donors and can be shown as-is.

Caching

GET responses may be cached for up to 60 seconds. Content changed in the admin appears within about a minute.

---

2. Content endpoints (GET)

Endpoint	Screen
`GET /home`	Home screen: every home section in one call
`GET /settings`	Contact details, social links, 80G / UPI / bank details
`GET /timings`	Open / closed status and the daily schedule
`GET /live`	Is the temple's YouTube channel streaming right now?
`GET /photos`	Explore tiles, page banner photos, Kovai Chandra photos
`GET /sevas`	Seva (donation) list
`GET /sevas/{slug}`	One seva
`GET /festivals`	Festival calendar
`GET /festivals/{slug}`	One festival with schedule, significance and gallery
`GET /services`	Devotional services
`GET /courses`	Courses and classes
`GET /posts`	Blog list (paged)
`GET /posts/{slug}`	One blog post
`GET /daily-darshan`	Daily darshan photos (newest first, paged)
`GET /art-gallery`	All artworks

`GET /home`

One call for the whole home screen. Sections that have no content are empty arrays or `null`.

```
{
  "heroSlides": [
    {
      "layout": "cinematic",            // "arch" (portrait photo) | "cinematic" (full-bleed)
      "tone": "purple",                 // purple | maroon | indigo | green | saffron | ivory
      "eyebrow": "Hare Krishna · Welcome home",
      "heading": "Abode of Sri Sri Jagannath, Baladeva & Subhadra",
      "text": "Come for darshan, stay for kirtan and prasadam.",
      "verse": null,
      "image": Photo,
      "video": Photo | null,            // MP4/MOV background video
      "videoWebm": Photo | null,
      "buttonLabel": "Today's Darshan",
      "link": "/daily-darshan"          // website path; map to an app screen
    }
  ],
  "timings": Timings,                   // same as GET /timings
  "highlightSevas": [Seva],             // 3 featured sevas
  "donationSevas": [Seva],              // up to 4 donation cards

01T00:00:00.000Z" | null } ],
  "settings": Settings                  // same as GET /settings
}
```

`GET /settings`

```
{
  "address": "Sri Jagannath Mandir, Hare Krishna Road,\nCivil Aerodrome (PO), Coimbatore - 641014",
  "phone": "+91 90422 16108",
  "whatsapp": "919042216108",           // digits with country code → https://wa.me/<whatsapp>
  "email": "iskcon.coimbatore@gmail.com",
  "mapUrl": "https://maps.google.com/…" | null,
  "social": { "facebook": "…", "instagram": "…", "youtube": "…", "whatsappChannel": "…" },
  "donations": {
    "reg80G": "…" | null, "reg80GValidity": "…" | null,
    "upiId": "…" | null, "upiQr": Photo | null, "bankDetails": "…" | null
  }
}
```

`GET /timings` → Timings

```
{
  "status": { "open": true, "label": "Temple Open · closes 1:00 PM" },   // India time, computed on
the server
  "openSessions": [ { "opens": "04:15", "closes": "13:00" }, { "opens": "16:00", "closes": "20:15"
} ],
  "schedule": [ { "time": "4:15 AM", "activity": "Mangala Arati" } ]
}
```

`GET /live`

Checks the temple's YouTube channel (@ISKCON_Coimbatore) at most once a minute. Never needs `x-api-key`.

```
{
  "live": true,                         // true only while actually streaming
  "videoId": "wwRU-m8hAvI",             // current stream, or the next scheduled one when not live
  "upcoming": false,                    // true when a stream is scheduled but has not started
  "title": "ISKCON Coimbatore is live",
  "embedUrl": "https://www.youtube-nocookie.com/embed/wwRU-m8hAvI?
autoplay=1&mute=1&playsinline=1&rel=0&modestbranding=1",
  "watchUrl": "https://www.youtube.com/watch?v=wwRU-m8hAvI",
  "checkedAt": "2026-11-01T12:35:49.592Z"
}
```

When `live` is `false`, `embedUrl` is `null` and `watchUrl` points to the channel's streams page. Show the stream with `embedUrl` in a WebView, or open `watchUrl` in the YouTube app.

`GET /photos`

```
{
  "explore":     { "deities": Photo, "kirtan": Photo, "prasadam": Photo, "goshala": Photo,
"kovaiChandra": Photo, "visit": Photo },
  "pageBanners": { "services": Photo, "courses": Photo, "festivals": Photo, "donate": Photo,
"volunteer": Photo,
                   "dailyDarshan": Photo, "artGallery": Photo, "blog": Photo, "contact": Photo },
  "kovaiChandra": { "banner": Photo, "photos": [Photo] }
}
```

Every slot is listed; empty slots are `null`.

`GET /sevas` → `{ "docs": [Seva] }`

Query	Values	Default
`category`	`regular`, `festival`	both
`monthly`	`true` → only sevas offered as monthly Nitya Seva	all
`includeClosed`	`true` → also festival sevas outside their dates	open only

Seva

```
{
  "slug": "annadaan",
  "title": "Annadaan Seva",
  "category": "regular",                // regular | festival
  "shortDescription": "Feed devotees and visitors with sanctified Krishna prasadam.",
  "image": Photo, "cardImage": Photo,
  "presetAmounts": [1500, 3000],        // quick-pick amounts in ₹
  "items": [ { "label": "Annadaan - 25 plates", "price": 1000 } ],
  "allowMonthly": true,
  "startDate": null, "endDate": null,   // festival sevas only
  "isOpen": true,
  "onlinePayment": true                 // false → donation is recorded, donor pays by UPI / bank
transfer
}
```

`GET /sevas/{slug}` returns one **Seva**, or `404`.

`GET /festivals` → `{ "docs": [Festival] }`

Query	Values	Default
`when`	`upcoming` (date ≥ today, soonest first), `past` (newest first), `all`	`upcoming`
`limit`	1–100	50

Festival

```
{
  "slug": "govardhan-puja", "name": "Govardhan Puja",
  "date": "2026-11-20T00:00:00.000Z", "timeLabel": "5:30 AM onwards",
  "shortDescription": "…", "image": Photo,
  "seva": { "slug": "annadaan", "title": "Annadaan Seva" } | null    // the "Support" button → donation for this seva
}
```

`GET /festivals/{slug}` adds:

```
{ "significanceHtml": "<p>…</p>" | null,
  "schedule": [ { "time": "5:30 AM", "activity": "Mangala Arati" } ],
  "gallery": [Photo] }
```

`GET /services` → `{ "docs": [Service] }`

```
{
  "id": 1, "title": "Speak to a Priest", "description": "…", "image": Photo,
  "action": "whatsapp",                 // donate → open seva  | whatsapp → wa.me chat | enquiry → contact form | link → open url
  "seva": { "slug": "annadaan", "title": "…" } | null,
  "url": "https://…" | null, "buttonLabel": "…" | null, "featured": true
}
```

`GET /courses` → `{ "docs": [Course] }`

```
{ "id": 1, "title": "Learn to Chant", "description": "…", "image": Photo,
  "schedule": "Every Saturday, 6:00 PM", "mode": "online", "zoomLink": "https://zoom.us/…" | null, "featured": true }
```

`mode`: `online` | `temple` | `both`.

`GET /posts` → paged list

Query	Values	Default
`page`	1…	1
`limit`	1–50	10
`category`	`Festivals`, `Philosophy`, `Temple News`, `Tamil`	all

```
{ "docs": [ { "slug": "…", "title": "…", "category": "Festivals", "publishedAt": "…", "author": "…"
| null,
              "image": Photo, "excerpt": "…" } ],
  "page": 1, "totalPages": 3, "totalDocs": 27 }
```

`GET /posts/{slug}` returns one post with `contentHtml`.

`GET /daily-darshan` → paged, newest day first

Query `page` (default 1), `limit` (days per page, 1–31, default 7).

```
{ "docs": [ { "date": "2026-10-31T00:00:00.000Z", "photos": [Photo] } ], "page": 1, "totalPages": 4
}
```

`GET /art-gallery` → `{ "docs": [Artwork] }`

```
{ "id": 12, "url": "https://…jpg", "width": 1600, "height": 1200, "alt": "…", "title": "Govardhan-
dhari", "kind": "Painting" }
```

3. Form endpoints (POST)

All return `201` with `{ "ok": true, "message": "<text to show the user>" }`, or a `422` error naming the field.

`POST /contact` → Admin → Contact messages

Field	Type	Required	Rules
`firstName`	string	✓	
`lastName`	string	✓	
`email`	string	✓	valid email
`phone`	string	✓	10–15 digits, may include `+`, spaces, `-`
`message`	string	✓	
`category`	string		`General` (default), `Donation / 80G receipt`, `Seva`, `Volunteer`, `Suggestion`, `Other`
`consent`	boolean		agreed to WhatsApp/SMS updates

```
{ "firstName": "Radha", "lastName": "Devi", "email": "radha@example.com", "phone": "9876543210",
  "category": "Seva", "message": "How can I sponsor Annadaan on my birthday?", "consent": true }
```

`POST /volunteers` → Admin → Volunteers

Field	Type	Required	Rules
`name`	string	✓	
`mobile`	string	✓	10–15 digits
`email`	string		valid email if given
`area`	string		where they live
`interest`	string or string[]		e.g. `["Festivals","Goshala","Prasadam"]`
`availability`	string		e.g. `"Weekends"`
`skills`	string		

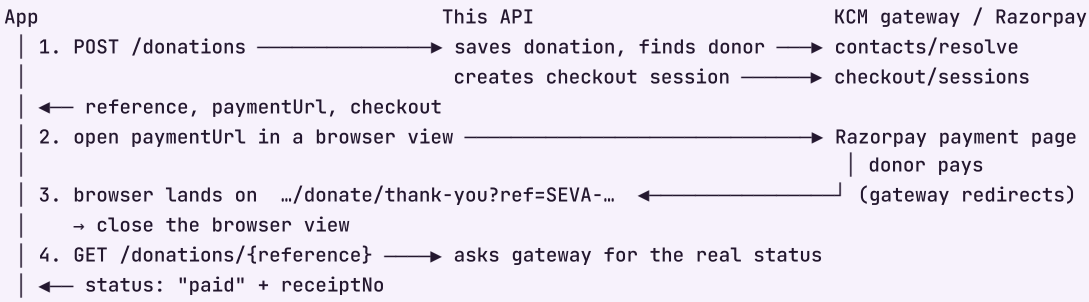

`POST /subscribe` → Admin → Subscribers

Field	Type	Required
`name`	string	✓
`email`	string	✓ (valid email; subscribing twice is fine)
`phone`	string	
`consent`	boolean	

4. Donations (online payment)

Payments go through the **KCM Payment Gateway** of ISKCON Coimbatore (Razorpay). The gateway issues the receipt and sends it to the donor on WhatsApp/email.

Flow

Step 1 — `POST /donations`

Field	Type	Required	Rules
`seva`	string	✓	seva `slug` from `GET /sevas`
`amount`	number	✓	rupees, whole number ≥ 1
`fullName`	string	✓	at least 3 characters; printed on the receipt
`mobile`	string	✓	Indian mobile, 10–15 characters (`9876543210` , `+91 98765 43210`)
`email`	string	✓	valid email
`item`	string		exact `label` of one of the seva's `items` (e.g. `"Annadaan - 25 plates"`); then the gateway's catalog price for that item is charged
`frequency`	string		`one-time` (default) or `monthly` — monthly charges the **first month now**; the temple follows up for later months
`occasion`	string		e.g. `"Birthday"`
`pan`	string		for 80G receipt, format `ABCDE1234F`
`address`	string		for 80G receipt
`pin`	string		PIN code
`consent`	boolean		receipts and updates on WhatsApp/email

Example:

```
{
  "seva": "annadaan",
  "amount": 1500,
  "fullName": "Prabhupada Dasa",
  "mobile": "9876543210",
  "email": "prabhupada.dasa@example.com",
  "frequency": "one-time",
  "occasion": "Birthday",
  "pan": "ABCDE1234F",
  "address": "12, Anna Nagar, Coimbatore",
  "pin": "641001",
  "consent": true
}
```

Response `201`, **online payment available**:

```
{
  "reference": "SEVA-3B34CEA9E2",
  "amount": 1500,                       // ₹ actually charged (from the gateway)
  "frequency": "one-time",
  "name": "Prabhupada Dasa",
  "onlinePayment": true,
  "paymentUrl": "https://iskcon-coimbatore-yztu.vercel.app/donate/pay?ref=SEVA-3B34CEA9E2",
  "checkout": {                          // only for apps using Razorpay checkout themselves; pass
unchanged
    "key_id": "rzp_live_…", "amount": 150000, "currency": "INR", "order_id": "order_…",
    "name": "ISKCON Coimbatore", "description": "Donation", "image": "https://…",
    "prefill": { "name": "Prabhupada Dasa", "contact": "9876543210", "email": "…" },
    "callback_url": "https://iskconcoimbatore.com/api/razorpay-verify", "redirect": true
  },
  "sessionId": "kpg_…",
  "returnUrlPrefix": "https://iskcon-coimbatore-yztu.vercel.app/donate/thank-you",
  "offlineReason": null,
  "offlinePayment": null
}
```

Response `201`, **online payment not available** (the donation is still recorded; show the UPI / bank details):

```
{
  "reference": "SEVA-9E53B59678",
  "amount": 1000,
  "onlinePayment": false,
  "paymentUrl": null,
  "checkout": null,
  "sessionId": null,
  "offlineReason": "seva_has_no_scheme_id",   // or gateway_not_configured | gateway_unavailable
  "offlinePayment": { "reg80G": "…", "reg80GValidity": "…", "upiId": "iskcon@upi", "upiQr": Photo,
"bankDetails": "…" }
}
```

For UPI, build: `upi://pay?pa=<upiId>&pn=ISKCON%20Coimbatore&am=<amount>&cu=INR&tn=<reference>`.

Step 2 — Pay

Open `paymentUrl` in an **in-app browser** (Android Custom Tabs / iOS `SFSafariViewController`) or a WebView. It opens Razorpay straight away. Do **not** change anything in the payment page or the `checkout` object.

Step 3 — Return

After payment the browser goes to a URL starting with `returnUrlPrefix` (`…/donate/thank-you?ref=SEVA-…`). The page itself shows the result, so it is fine to leave it open; or, in a WebView, watch for this URL, close the view and continue with step 4.

Step 4 — `GET /donations/{reference}`

The **only** source of truth. Return-URL parameters are hints, not proof of payment.

```
{
  "reference": "SEVA-3B34CEA9E2",
  "status": "paid",                    // created | paid | failed | expired | refunded
  "amount": 1500,
  "seva": "Annadaan Seva",
  "name": "Prabhupada Dasa",
  "receiptNo": "12345",
  "paymentId": "pay_…",
  "paidAt": "2026-10-31T10:05:12.000Z",
  "failureReason": null,
  "onlinePayment": true
}
```

`status`	Meaning	App should
`created`	Not paid yet, or still being confirmed	Poll every 3–5 s for up to 2 min, then show "We'll confirm shortly"
`paid`	Paid and receipt issued (`receiptNo` set)	Show success with `receiptNo`
`failed`	Payment failed	Show `failureReason` ; offer to start again (new `POST /donations`)
`expired`	Not paid in time	Start again with a new `POST /donations`
`refunded`	Refunded by the temple	Show as refunded

A donation counts as successful **only** when `status` is `"paid"` **and** `receiptNo` is not null.

Testing donations in Postman

- Run **Donations → Start donation**; the collection saves `reference` and `paymentUrl` .
- Open `paymentUrl` in a browser to pay; then run **Donation status**.

- **The production gateway takes real money.** Use a seva with a small amount, or ask ISKCON IT (itsupport@iskconcoimbatore.com) for a staging gateway and secret.
- To test without paying: use a seva whose `onlinePayment` is `false` → the response has `onlinePayment: false` and nothing is charged.

5. For the temple team (admin setup)

Where	What
Admin → **Sevas** → a seva → **Gateway scheme ID** (right sidebar)	The open-amount scheme ID from ISKCON IT's gateway catalog, e.g. `1-51`. Without it, that seva shows UPI / bank details instead of online payment.
Admin → **Sevas** → a seva → **Items** → **Gateway scheme ID**	Optional fixed-price scheme for that item; the gateway charges its own catalog price.
Admin → **Donations**	Every donation with its reference, status, receipt number, Razorpay ids and whether it came from the website or the app.
Vercel → Environment Variables	`KCM_PAYMENT_GATEWAY_SECRET` (required for online payment), `SITE_URL` (optional; defaults to the Vercel production address), `KCM_PAYMENT_GATEWAY_URL` (optional; defaults to production gateway), `APP_API_KEY` (optional; requires `x-api-key` on the app API).
ISKCON IT	Must allowlist the return URL `https://iskcon-coimbatore-yztu.vercel.app/donate/thank-you` (any `?ref=…` query).
